Item #2.

Questions/Comments received after mandatory Pre-Bid Meeting:

Question #1: The trees and fence on the north side of the cooling tower yard look to present an issue for air flow on the new chiller in Alt 3. Who will be responsible for removal or relocation of these things?

Answer #1: The sales representative and manufacturer's representative for the cooling tower selected as basis of design have stated that airflow impact from the trees will be negligible. Any site modifications to facilitate installation of the cooling tower, including but not limited to removing trees or sections of the fence, shall be performed by the contractor and the costs carried in his/her bid number.

Question #2: In the event that only the base bid is approved, will the existing 700-ton chiller-1 be able to carry the load of the campus while the chiller-2 is replaced?

Answer #2: Yes, Existing 700-ton chiller will carry the load of the campus. However, in the occupied emergency shelter mode, the existing 700-ton chiller will not operate on emergency power, and only the two (2) new air-cooled chillers, in temporary installation configurations, will be required to operate on the existing emergency generator load, to carry the emergency shelter cooling load. New air-cooled chillers shall be on site and operable for the emergency shelter operations, before the commencement of demolition of the 300-ton chiller and 300-ton cooling tower and associated pumps.
